Data Recovery Service

For 3 years from the date of purchase, ATR Computers will provide a service which will attempt to recover your data files if your system needs to have the Operating System reloaded. ATR Computers does not guarantee that data recovery can be made in all cases but will attempt to do so. Please understand that there are certain failure modes that make data recovery impossible such as a badly damaged hard drive. ATR Computers strongly recommends that you exercise regular data backup to external media. Also, please note that this service is for data only - programs can not be recovered. You must reinstall programs from the original media that you used to install the program. Also email can not be recovered. If you are using a web based email such as GMAIL, your email is already saved as it is on an external server. If you use local email such as Microsoft Outlook those files will not be recovered. We strongly suggest that you should use a web based email service!! This service will recover data such as your pictures and Microsoft Office files. You are responsible for shipping costs if you need data recovery services.
